Statement of reasons for allowance

Claims 4,8,12,16,20,24,28,32,36,39,40,41,45 have been allowed.

Although vertical transistors with control electrodes in trenches have been known in the art, and specifically PN: 6,677,641 could be considered closely related art in that it is a power MOSFET provided with electrodes (236, 214, a, b) in a single trench and circumscribed with a single continuous insulation material, the claimed power semiconductor structure having a drift, a well, and first and second trenches provided with a buried and control electrodes through first and second insulation layers and the claimed electrode configuration having characterized by said first and second electrodes as connected to the claimed elements of the overall structure and specially the source electrode in connection with the well region and the buried electrode inside the first trench and under the control electrode has not been taught or rendered obvious by the prior arts.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PN: 6,906,380; 6,677,641; 6,784,488.
